COGNITIVE VERBS

PREVIEW OUR COGNITIVE VERBS HERE:
portal.mightyminds.com.au/resources/cognitive-verbs

Commencing in 2019, 74 cognitive verbs will replace the current 49 Common Curriculum Elements in the new QCE system. The cognitive verbs are the foundation of ALL assessment in the new system. Understanding the cognitive verbs will be vital to student success. Consequently, we have deconstructed each cognitive verb and produced an effective guide on how to teach each stage of the Cognitive Thinking levels in relation to that specific verb. We can provide highly beneficial professional development for your teachers on how to embed Cognitive Verbs into their curriculum. Furthermore, we have produced a poster for each cognitive verb that can be displayed throughout your school to inspire student understanding. Additionally, we have available in-depth lessons to teach students these crucial skills. Each lesson includes:

- A poster explaining the thinking levels associated with that cognitive verb.
- Exemplars for every cognitive level of understanding.
- Questions, marking schemes, steps and model answers across multiple subject areas.
- 60-minute lessons with an average of 30 pages of material.

**74 CV LESSONS –
OVER 2350 PAGES**
