

Links To Life

Links to Life Guide (Students)

How do I download Links to Life lessons?

You'll be provided with details to log into our portal from your teacher, either in class or via email. Once you have these details, log in and click the Links to Life button. Exams and the assignment are listed on the left sidebar and the resources you need are listed on the right. The workbooks are organised by topic, so simply click the name of the workbook you need to download it. It's a good idea to download each workbook as needed rather than downloading all workbooks at the beginning of the year.

Looking for more activities?

Teachers and students can download our free Mighty Minds Assistant app suitable for iPhones and iPads. This is not needed for the course, as all the knowledge required to complete the exams is covered in the student workbooks. However, the app provides links to additional articles and videos related to the content of the student workbooks, and can be a useful supplementary tool. To download the app, go to: <http://mightyminds.com.au/app>
