

ONLINE PROGRAMS

Steps to the Future

Steps to the Future is designed to help students pave their own pathways in life, focussing on their future education, training and careers.

Students work through four carefully crafted chapter based on the **QCAA Career Education Short Course Syllabus (2018)**. Each section steps students through the process of finding work, setting goals for the future and identifying their strengths and weaknesses in order to build the ideal career path.

Who Am I?

Students identify their own skills, traits and values and begin learning how to use these to make themselves employable.

The World of Work

Students prepare for the modern workplace by learning about the workforce, the changing world and employer expectations.

My Career Options

Students begin to form their own vision for a career pathway, and investigate different options.

Planning for my Future

Students develop their chosen pathways, and learn the fundamentals of job hunting and holding.

Students will engage in online activities that include relevant, practical information that they can use as they transition through their senior high school year sand later into work, tertiary education, apprenticeships or training courses.

The *Steps to the Future* online program costs \$20 plus GST per student.
